

Shapes Toolkit Key

Equilateral Triangle:  <p>A triangle with all sides of equal length.</p>	Isosceles Triangle:  <p>A triangle with two sides of equal length.</p>	Scalene Triangle:  <p>A triangle with no sides of equal length. That is, all sides have a different length.</p>	Scalene Right Triangle:  <p>A triangle with a 90° angle and all sides of different length.</p>
Isosceles Right Triangle:  <p>A triangle with a 90° angle and two sides of equal length.</p>	Square:  <p>A quadrilateral with four right angles and four sides of equal length.</p>	Rectangle:  <p>A quadrilateral with four right angles.</p>	Parallelogram:  <p>A quadrilateral with two pairs of parallel sides.</p>
Trapezoid:  <p>A quadrilateral with one pair of parallel sides.</p>	Rhombus:  <p>A quadrilateral with all sides of equal length.</p>	Quadrilateral:  <p>A polygon with four sides.</p>	Kite:  <p>A quadrilateral with two pairs of consecutive, equal sides.</p>
Regular Pentagon:  <p>A five-sided polygon with all sides of equal length and all angles of equal measure.</p>	Regular Hexagon:  <p>A six-sided polygon with all sides of equal length and all angles of equal measure.</p>	Isosceles Trapezoid:  <p>A quadrilateral with two parallel sides, two sides of equal length, and one pair of base angles with equal measure.</p>	Circle:  <p>The set of points equidistant from a central point.</p>
